

DYMO's RhinoPRO industrial tape range

*Tapes that stick like nothing
you have seen before!*

RhinoPRO
Industrial Tapes

General Info

Industrial environments present challenges in identification and require therefore labels with a high performance. DYMO daily invests in Research and Development to make sure we can offer the customer the right product for the right application.

No more labels that fall off, looking smeared or poorly written. DYMO has the right solution to your labeling needs!

Each material/ribbon combination is uniquely identified by a material number (MXXXX) for which a technical datasheet is created.

RhinoPRO
Industrial Tapes

The DYMO 2 in 1 cassette principle:
ribbon and material in one cassette makes sure that you always have the correct combination for high-performance print results.

General Info

We know what type of labels you need!!!

A whole team of chemists and highly qualified lab people are working together in development and testing to ensure the durability of our labels under the most extreme conditions. This way we are sure to offer labels that can withstand the most tough environments.

Flexible Nylon Tape

The permanent solution for marking your wire and cables!

The combination of a **permanent adhesive** and a superior **flexible nylon** are the perfect solution for marking any curved surfaces. No more concerns about labels that pop off after a while. These labels remain firmly tightened around the cable!

Flexible Nylon Tape M1300

Features

A strong adhesion and a **flexible nylon** material makes this tape the ideal solution for wire and cable marking even in environments where oil and dirt are present.

Heat Shrink Tubing

Identify and protect your wire and cables!

Looking for a non-adhesive yet permanent solution to identify and protect your wire and cables at the same time? DYMO's heat shrink polyolefin tubes provide clean and permanent marking for a wide range of cable diameters. These sleeves are applied before connection and can be permanently positioned after connection when shrunk with a heat-gun.

Features

- 3:1 shrink ratio
- Conforms tightly to the wire when heat is applied
- Heat-shrinkable polyolefin
- Does not smudge or fade when printed.
- The legend remains legible even after exposure to abrasion, cleaning solvents or industrial fluids
- Flame retardant
- MIL-DTL-23053/5 classes 1 and 3

RECOMMENDED CABLE DIAMETER RANGE:

6mm:	min. 1.18mm – max. 2.33mm
9mm:	min. 1.73mm – max. 3.73mm
12mm:	min. 2.97mm – max. 5.13mm
19mm:	min. 4.64mm – max. 8.70mm

Non-adhesive Tag (Insert)

Versatile and strong solution

This non-adhesive polypropylen solution which is un-tearable offers a flexible way of providing high-quality on-the-spot labeling. You can cut the insert to the size you need that fits with any:

- patch panels
- modular component
- cable marking: label holder of your choice.

Non-adhesive Tag (Insert) M1600

Features

- **Polypropylen material:**
Rigid and untearable which makes it a very durable solution.
High print quality performance.
- **Easy to use:**
the label can easily be removed and replaced from any holder.

Coloured vinyl

Recognise your identification from a distance !

Coloured vinyl labels are a perfect solution if you want your identification to be clearly understood. The strong adhesive and the flexible material turns this vinyl tape ideal to be used for labels to stick onto many applications such as:

- machines and equipment (warnings and safety instructions)
- Buttons
- Barcode labeling
- Patch panels
- Outlets
- Wire and cables

Coloured vinyl M1500

Features

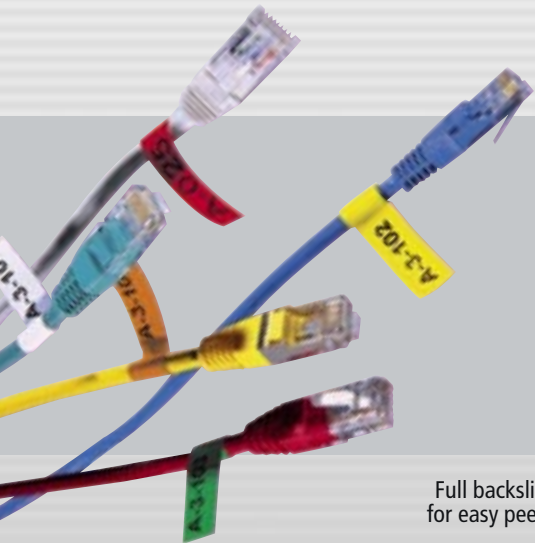

- The permanent adhesive and flexible vinyl makes it ideal to be used for any flat/curved or textured surface where colour is requested.
- Combination ribbon/material gives an outstanding scratch-, solvent-, oil and UV resistance
- Indoor and outdoor use

Permanent Polyester

For your toughest labeling challenges !

This permanent polyester material has been developed for withstanding the most demanding needs in an industrial environment. Designed for application to extremely rough surfaces where increased adhesion and resistance to dirt and oils is required such as:

- Name-and rating plates
- Product/Equipment/Machine labeling
- Cabinet/Rack identification
- Patchpanel identification

Dry-edges
for easy removal

Permanent Polyester M1120 / M1140

Features

Super adhesive: perfect for surfaces requiring outstanding sticking and durability such as:

- Highly-textured and/or powder coated surfaces
- Material/ribbon combination results in an outstanding print quality and uv-oil-scratch- and chemical resistance
- Indoor and outdoor use

Clear Polyester

The solution for integrated product labeling!

Clear polyester tape offers an esthetic way of labelling applications. The clear labels with the sharp printed black characters integrate very nice the structure and background of the application. Any text looks as if it was printed directly onto the surface.

The Clear polyester tape can be used onto:

- Outlets
- Patch panels
- Faceplates

Clear Polyester M1100

Features

- Clear polyester labels give a touch of professionalism to the labeling
- The ink is scratch-solvent, oil and UV resistant
- Fit for in- and outdoor use
- Permanent adhesive

Full backslit for easy peel

Packaging

The DYMO industrial tapes can be recognized by the dark gray cassettes.

All cassettes are flow-wrapped to give them extra protection.

They are packed in a single box that can be re-closed.
2 cassette labels give the information concerning the material type, size and color.
