

LockRight Brand

# **GripLockTies™**

**RUBBER-LINED, RELEASABLE ZIP TIES**

Designed with aviators, racers and off-roaders in mind, this new invention is the biggest thing to hit the zip tie market since... well, the zip-tie. We are proud to introduce the world's first rubber lined zip tie. Cushioned, and down right sticky, GripLockTies™ will stay put and won't damage wires or paint. Finally a product that solves problems as old as the zip tie itself; crushing wires, scratching paint, chafing, and slipping. Useful anywhere wire and equipment condition is a priority, especially when vibration is a factor.

## Standard zip ties cause damage

## GripLockTies™ CUSHION AND PROTECT

The unique rubber lining of GripLockTies™ eliminates the tendency to over-tighten and distributes the tension more evenly around a wire bundle, eliminating damage to wires at a single friction point. The releasable tab allows you to remove or reset your tie, even after snugging it tight, saving you from wasting ties when running multiple wires or when you forget that last wire.

## MATERIALS

### PLASTIC:

- Dupont Zytel
- UV Resistant Black
- Toughened
- Heat Stabilized
- Impact Modified
- Nylon 66-1 ISO1043
- Non-Magnetic
- Non-Conductive

### RUBBER LINER:

- Protection Adhesion Promoted
- Thermoplastic Elastomer
- ShoreA 58 A ASTM D2240
- Elongation at Break >375%
- Compression set of 255 ASTM D395B

**STRENGTH:** 70 lbs. rated pull strength

**TEMPERATURE:** -40°F (-40°C) to 221°F (105°C)

**FLAMMABILITY:** UL94, UL 746A, IEC 60695-11-10

**ABSORPTION:** Immersion 24 Hour ISO 62 0.9%
