

INSULTHERM® HEADER WRAP SI

AMORPHOUS SILICA • WITHSTANDS HEAT UP TO 2,000°F
INCREASES HORSEPOWER & FUEL EFFICIENCY

Insultherm® Header Wrap SI is extremely high temperature resistant. Commonly used on the headers and exhaust. Header Wrap SI is made from texturized amorphous silica filament yarn woven into a strong and flexible form. Because the yarn is texturized into a bulky form it provides excellent insulating values. Header Wrap SI is not made from leached fiberglass, resulting in a much more wear resistant finished product. It reduces under-hood temp. up to 70%, increases horsepower and fuel efficiency. Insultherm® Header Wrap SI works by holding heat within the header, which creates a better exhaust flow. This allows easy removal of spent gases and creates more airflow to the engine.
