

# PRODUCT SPECIFICATION SHEET

**Product Name: Yellow Jacket® Advanced Modular System**

Part #	Description	# Of Channels	Channel Height	Channel Width	Length (A)	Width (B)	Height (C)	Weight
CPYJ5-125-ASAH-DS	Assembled	5	1.10"	1.25"	36"	22.50"	1.90"	28 lbs
CPYJ5-125-ACAH-DS	Center	5	1.10"	1.25"	36"	12"	1.90"	16 lbs
CPYJ5-125-RMAH-DB	Male End Ramp	n/a	n/a	n/a	36"	n/a	1.90"	6 lbs
CPYJ5-125-RFAH-DB	Female End Ramp	n/a	n/a	n/a	36"	n/a	1.90"	6 lbs

Yellow Jacket® AMS is an advanced modular system that is designed to change and grow with your cable management needs. This modular system allows you to protect anywhere an unlimited number of cables or hoses. Center sections can be added or removed to suit your changing needs. Each change expands or condenses the space needed for your cables.

Space is efficiently used with the Yellow Jacket AMS protectors. The straight edges provided by the center sections allow you to use less space for parallel cable runs. The sides will fit flush against a wall or interlock with another AMS section. This eliminates the spaces between the cord protectors that are usually created by other cord covers. The interlocking feature of each section can also be used to create a flat stable surface.

Multiple ramps may be combined to create ADA compatible ramps. The arched construction and tough Durathane (trademark) polyurethane make the Yellow Jacket AMS strong enough to bear just about any load. This compatible ramp makes for ideal access with forklifts or small vehicles.
