CABLES

ADAM HALL CABLES

WHAT DO WE STAND FOR?

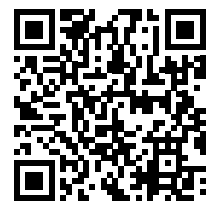

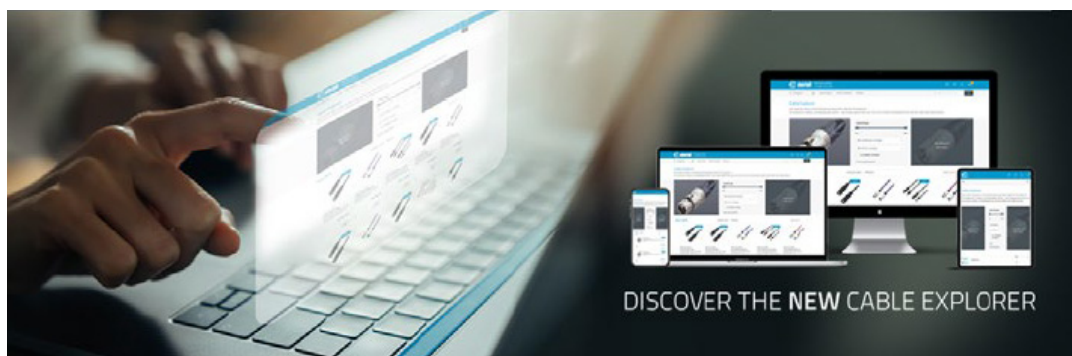

The veins in your body are absolutely essential for life. They serve as the conduit for oxygen, transporting it from the lungs to all parts of your system, much like how cables facilitate the transmission of signals in event technology.

Cables – acting as the crucial link between all devices – are indispensable for ensuring the seamless operation of shows, fairs, and installations. Whether it's the connection from your guitar to the amplifier, your mixing console to the sound system, or your lighting controller to the lamp, cables are undeniably the unsung heroes of any event.

Adam Hall Cables® is on a mission that goes beyond connecting devices; it's about fostering connections between people.

We offer an extensive range of cables, cable drums, power strips, and accessories designed for various applications. Our product range is thoughtfully structured, offering a wide spectrum of quality levels, making it easy for you to find your perfect cable quickly.

Navigating through the jungle of cables can be challenging. We provide straightforward and effective solutions to simplify the process for you. For example, we have introduced the Adam Hall Cable Explorer on our website. Simply select your desired connectors and embark on a journey through the world of cables!

[www.adamhall.com/
shop/kabel-stecker/
cable-explorer](http://www.adamhall.com/shop/kabel-stecker/cable-explorer)

Our commitment to connecting people extends to providing you with invaluable strategies. Another user-friendly tool we offer to help you select the right cable is our STAR SERIES system. With its familiar and intuitive designed structure, it offers an instant overview of the quality levels associated with different products.

PRE-ASSEMBLED CABLES LET'S GET SERIES!

We offer various solutions for you, so you have the right ready-made-cable on hand. This is true whether you are looking for an instrument cable, a microphone cable, or a hybrid cable for simultaneous transmission of DMX signals and power. For professional event technology setups to the beginner in the home studio, you will find the pre-assembled cable that best suits your needs here.

5 STAR

Our top tier series offers products featuring original Neutrik® connectors and is proudly made in the EU. Neutrik is the global leader in connector manufacturing for the event industry, offering unwavering commitment to the highest quality standards and continuous innovation. The majority of our superior quality cables boast a larger conductor cross-section for enhanced signal transmission and improved impedance and capacitance values. They also come equipped with a braided shielding (where necessary) ensuring an extreme reduction in magnetic interference.

A dark grey square containing a large white number '5' with the word 'STAR' in white capital letters below it.

- › Made in the EU
- › Original Neutrik® connectors
- › Superior quality product
- › With high conductor cross-sections made of oxygen-free copper
- › Superior quality impedance & capacitance values

4 STAR

If you are seeking cables of premium quality, our “standard” option, known as the 4 STAR SERIES, is your go-to choice. Typically assembled with either REAN® connectors, a brand of the Neutrik group, or premium-quality Adam Hall Connectors®, you can expect a top solution with exceptional durability and high-class signal transmission standards. The 4 STAR SERIES typically offers the most extensive and comprehensive range of options to meet your needs.

A light grey square containing a large white number '4' with the word 'STAR' in white capital letters below it.

- › REAN® connectors (a brand of the Neutrik® group), or premium quality Adam Hall Connectors®
- › Premium quality cables
- › High variety of different lengths or colours
- › Best transmission quality

3 STAR

You can rely on the high-quality standards of all our products. For our 3 STAR SERIES, we ensure the inclusion of oxygen-free copper conductors, guaranteeing a minimum purity level of 99.999% copper. Our commitment extends to robust and reliable jacket materials, excellent flexibility, and top-notch spiral shielding, ensuring reliable performance and durability.

A brown square containing a large white number '3' with the word 'STAR' in white capital letters below it.

- › High quality Adam Hall Connectors®
- › OFC cables (oxygen free copper)
- › Strong and reliable jacket
- › Spiral shielding
- › High transmission demands
