Adjustable Depth Wall-Mount Rack with Shelf (100 lb) APBS Series

Adjustable depth wall bracket with integrated shelf for mounting rack and non-rack equipment in telecom and IT installations

TOP SELLER

Key Features and Benefits

- 14-gauge steel construction (100 lb **capacity**) provides reliable support for patch panels, switches, and rack-mounted equipment.
- Adjustable depth design (12" to 18") allows flexible mounting without disassembly.
- Integrated 12" accessory shelf with an additional 2U equipment space supports non-rack equipment such as modems, routers, or small devices.
- One (1) pair of 10-32 threaded 19" mounting rails with rack unit indicators supports standard rack equipment and consistent installation. Includes starter hardware pack with (25) 10-32 screws (**SCREW1032-25**) for equipment mounting.
- Rear cable access with multiple tie points supports organized cable routing in wall-mounted installations.
- Self-squaring knock-down design ships unassembled for easier handling and reduced shipping cost.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance

The APBS Series adjustable depth wall bracket with shelf provides a flexible solution for mounting both rack and non-rack equipment in telecom and IT environments. With adjustable depth from 12 to 18 inches and an integrated 12-inch shelf, it supports installation, cable management, and equipment organization without requiring a full cabinet.

Constructed from 14-gauge steel with a 100 lb load rating, the APBS Series is ideal for structured cabling, network equipment, and mixed-device installations where flexibility and simplicity are required.

Where the APBS series works best

- Telecom backboards and network demarcation points.
- Small network closets with mixed rack and non-rack equipment.
- Wall-mounted installations requiring integrated device support.
- Retrofit installations where space and flexibility are limited.
- Installations requiring both mounting rails and shelf space.

Applications and when to use the APBS series

- Installations requiring rack mounting with additional shelf support for non-rack equipment
- Applications needing adjustable depth for varying equipment sizes.
- Environments where open mounting is preferred over enclosed cabinets.
- Deployments requiring organized cable management and accessory integration.
- Installations where modems, routers, or small devices must be mounted alongside rack equipment.

When another product may be a better choice

- When you need a hinged wall bracket greater than 8U, consider our **APB** Series.
- When you need a heavier-duty or center-swing bracket, consider our **HWMR** Series.
- When you need a simple two-post wall bracket for minimal equipment, consider our **RB-2PW** Series.

Accessories

- Universal Rack Shelf Fixed Steel (Up to 200 lb Capacity)
- Hook and Loop Cable Straps Pre-Cut 96 Inch
- We Manufacture PDUs and Outlet Strips
- Rack Panels for Rack Optimization
- 10-32 Mounting Hardware
- Ground Stud Kit
