## Cable Ladder Rack Ceiling Mount Bracket *CLCMB Series*

Ceiling mount bracket designed to suspend ladder rack systems using 3/8" threaded rod for overhead cable routing.

### Key Features and Benefits

- 14-gauge steel construction provides durable structural support for suspended ladder rack systems.
- Includes a pair of ceiling brackets and ladder support, enabling secure overhead suspension.
- Designed for use with 3/8 in threaded rod (sold separately) for flexible installation height and configuration.
- Enables ladder rack suspension from ceilings where wall or floor mounting is not practical.
- Supports scalable overhead cable routing systems in open environments.
- Provides stable load distribution for ladder rack runs across long spans.
- Compatible with CL Series ladder rack and similar cable runway systems.
- Ideal for data centers, telecom rooms, and structured cabling environments.
- Ceiling mounting hardware sold separately, allowing installation flexibility based on structure type.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The CLCMB Series ceiling mount brackets provide a reliable solution for suspending ladder rack systems from overhead structures. Designed for use with threaded rod, they enable flexible height adjustment and stable cable routing in open environments.

Constructed from durable steel, the CLCMB Series supports scalable ladder rack installations in data centers, telecom rooms, and network infrastructure deployments.

### Where the CLCMB Series Works Best

- Data centers and server rooms
- Telecom and network installations
- Structured cabling environments
- Overhead ladder rack systems
- Installations requiring ceiling-supported cable routing

### Best Applications for the CLCMB Series

- Suspending ladder rack from ceiling structures
- Creating overhead cable routing pathways
- Supporting long ladder rack runs across open spaces
- Adjusting ladder rack height using threaded rod
- Enabling flexible cable routing layouts
