Cable Ladder Rack Wall Mount Bracket *CLWMB Series*

Wall mount bracket designed to secure ladder rack systems directly to wall surfaces without requiring splice kits.

Key Features and Benefits

- 16-gauge steel construction provides durable structural support for ladder rack wall mounting.
- Direct mount design eliminates the need for butt splice kits, reducing parts, cost, and installation time compared to competitive solutions.
- Designed to securely attach ladder rack systems directly to wall surfaces for stable cable routing.
- Sold in pairs for balanced and secure installation.
- Universal design fits many ladder rack brands for flexible deployment.
- Simplifies installation by reducing components and alignment steps.
- Wall mounting hardware not included for flexibility based on wall type.
- Ideal for telecom rooms, data centers, and structured cabling environments.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The CLWMB Series ladder rack wall mount brackets provide a streamlined solution for securing ladder rack systems directly to wall surfaces. Designed to eliminate the need for additional splice kits, they simplify installation while maintaining structural integrity.

With durable steel construction and universal compatibility, the CLWMB Series supports efficient, scalable cable routing systems in data centers, telecom rooms, and network environments.

Where the CLWMB Series Works Best

- Data centers and server rooms
- Telecom and network installations
- Structured cabling environments
- Wall-mounted ladder rack systems
- Installations requiring simplified mounting

Best Applications for the CLWMB Series

- Mounting ladder rack directly to wall surfaces
- Reducing installation time and component count
- Eliminating the need for splice kits in wall-mounted runs
- Supporting overhead cable routing systems
- Improving installation efficiency and consistency
