HKL-1232

12 Ton Crimping Tool

2-Speed Hydraulic
Pump

Dependable Simple Crimping Tool...

If you're looking for an easy to operate and rugged 12-ton crimping tool, the HKL1232 is the tool you need. The HKL1232 has a 2-speed hydraulic pump that advances rapidly until it contacts the connector before shifting to a lower speed to complete the crimp. Pumping the handles until the relief valve pops open indicates the crimp is complete. To retract the ram, simply twist and close the movable handle.

The "C" shaped head has a wide 1.3"(32 mm) opening that makes it easy to place the tool onto the connector and remove it from the connector. The head also rotates 180° to get into tight places. And, the HKL1232 uses all industry "U" style or shell-type dies designed for 12-ton crimping tools.

Yet another new innovative tool from Greenlee - designed to make your job faster, safer and easier.
