lev-lok™
Modular Receptacles

A new line of wiring devices engineered for fast & easy installation

Lock and Latch Wiring Module Simplifies Large Wiring Device Jobs While Delivering the Most Secure Connection

Leviton's latest receptacle family is a revolutionary design called the Lev-Lok™ Modular Receptacle System. It consists of a wiring module (locking connector and leads) and a rugged duplex receptacle with solid brass locking connection pins. Place the wiring module over the receptacle's locking pins, twist clockwise and the connection is secured. Leviton's modular devices address the reliability and performance concerns of specification engineers without sacrificing the contractor's need for fast, easy installation. They are ideal for both retrofit and new construction in universities, hospitals, hotels and office complexes.

lev-lok™

Modular Design Streamlines Installation and Reduces Costs
Simple...
Designed with the busy contractor in mind.

All of Leviton's Lev-Lok wiring modules arrive equipped with protective cover and circuit ID label. The unique protective cover keeps the module's connections debris-free until the receptacles are installed. The wiring module's circuit ID label eliminates a post rough-in step and makes troubleshooting faster and easier.

Lev-Lok's innovative lock and latch design eliminates guesswork by allowing only one module orientation. The wire leads always mate to the same receptacle terminals during installation or replacement making installation simple, fast, and accurate.

MSTWL with circuit ID label.

MSTWL wiring module with protective cover.

Easy...
Connect and twist to lock.

In just two quick and easy steps, the receptacle is securely attached to the wiring module. Simply place the wiring module over the receptacle's connection pins and twist clockwise to lock.

Replacing a receptacle? It's just as easy. Reverse the same two steps... turn module counter clockwise to unlock and remove.

Lock and latch. It's that easy.

Secure...
Lock & latch system.

Leviton's connection system locks and latches the wiring module to the receptacle providing double the security without adding to the assembly steps.
Designed for high usage areas such as hospitals and schools, Lev-Lok receptacle replacement is easy and secure.

Engineered for safety and longevity.

lev-lok™

Smooth face prevents dirt from collecting and makes cleaning faster and simpler

Grounding clip permanently secured to strap makes for most reliable equipment ground connection
Four corner latches securely fasten the receptacle's face to the body

Face includes threaded bushing for reliable, secure wallplate attachment

Large triple-wipe, nickel-plated brass (hospital grade) or solid brass (industrial grade) "T" contacts for superior contact and conductivity day-in and day-out

Impact-resistant nylon cover and body

M5362-W
Duplex Receptacle

Nickel-plated brass (hospital grade) or solid brass (industrial grade) single-piece, wrap-around mounting strap with integral ground contact, for continuous conductivity and secure ground path
Two latches mate with wiring module for twice the security

Solid brass locking pins for strong, secure connection between receptacle and wiring module

Impact resistant nylon cover with-stands abuse

Look for the Lock! Patented lockout feature prevents RESET if the GFCI circuit is no longer functioning properly.
Advanced electronics offer superior resistance to surges and over-voltages

Silver alloy contacts for reliable make/break switching

Green LED indicator light: When illuminated, it indicates power is present.

Grounding clip permanently secured to strap makes for most reliable ground connection

M7599-I
GFCI Receptacle

Two latches mate with wiring module for twice the security

Solid brass locking pins for strong, secure connection between receptacle and wiring module

Wiring module includes factory-installed circuit ID label so that electricians can save a step by labeling device locations during rough-in

Wiring module ships in clear polybag with protective cover preventing debris from entering contacts until receptacle is attached

Complementary wallplates made from plastic, nylon, or metal are available for Lev-Lok receptacles. Choose from:
- Single, Two, Three, & Four Gang
- Eight Colors: Ivory, Black, Gray, Blue, White, Brown, Red, Light Almond, & Stainless Steel
- Hot Stamped or Engraved
