LEV-LOK™

Modular Receptacles

Introducing a revolutionary new line of wiring devices engineered for fast and easy installation.
Leviton’s latest receptacle family is a revolutionary design called the Lev-Lok™ Modular Receptacle System. It consists of a wiring module (locking connector and leads) and a rugged duplex receptacle with solid brass locking connection pins. Place the wiring module over the receptacle’s locking pins, twist clockwise and the connection is secured.

Leviton’s modular devices address the reliability and performance concerns of specification engineers without sacrificing the contractor’s need for fast, easy installation. They are ideal for both retrofit and new construction in universities, hospitals, hotels and office complexes.

LEV-LOK™ = SIMPLICITY PLUS SECURITY

For Use in High Traffic Locations such as Patient Care Areas, Hotel Facilities, and University Dormitories
Leviton’s New Lev-Lok™ Modular Design Streamlines Installation Process and Reduces Installation Costs

Simple...
Designed with the busy contractor in mind.
Wiring modules arrive equipped with protective cover and circuit ID label. The protective cover keeps the module’s connections debris-free until the receptacles are installed. Eliminate another post rough-in step and use the wiring module’s circuit ID label — making walk-through troubleshooting faster and easier.
Lev-Lok’s innovative lock and latch design eliminates guesswork by allowing only one module orientation. Wire leads always mate to the same receptacle terminals during installation or replacement.

Easy...
Connect and twist-to-lock.
In just two quick and easy steps, the receptacle is securely attached to the wiring module. Simply place the wiring module over the receptacle’s connection pins and twist clockwise to lock.
Replacing a receptacle? It’s just as easy. Reverse the same two steps: turn module counter clockwise to unlock and remove.

Secure...
Lock & latch system
Leviton’s connection system locks and latches the wiring module to the receptacle providing double the security without adding to the device’s depth or assembly steps.
Lev-Lok™ receptacles are designed for high usage areas such as hospitals and schools so we made replacement easy and secure.
**LEV-LOK™ MODULAR SYSTEM FEATURES**

**SIMPLE AND EASY TO USE, YET PROVIDES SECURE CONNECTIONS**

Grounding clip permanently secured to strap makes for most reliable ground contact.

Face includes threaded bushing for reliable, secure wallplate attachment.

Nickel-plated brass (hospital grade) or solid brass (industrial grade) "T" contacts for superior contact and conductivity day-in and day-out.

Two latches mate with wiring module for twice the security.

Smaller brass locking pins for strong, secure connection between receptacle and wiring module.

Four corner latches securely fasten the receptacle’s face to the body.

Wiring module locks and latches to the receptacle body providing double the connection security.

Lev-Lok™ Modular System Accessories

Complementary plastic, nylon, and metal wall plates. Choose from:

- Single, Two, Three, & Four-Gang
- Nine Colors: Ivory, Black, Gray, White, Brown, Red, Almond, Light Almond, & Stainless Steel
- Hot Stamped or Engraved
