Adhesive Lined Grommet Edging

Grommet edging protects and prevents wires and cables from chafing against sharp edges of panel walls and knockouts. In addition to standard grommet edging, PANDUIT offers grommet edging with a pressure sensitive adhesive that lines the base of the product. This provides for an easy, clean, and secure application. Adhesive lined grommet edging is available in natural and weather resistant polyethylene and can be used on straight or irregular shaped surfaces.

Clean the edge of the panel, install the product over the edge of the panel and then apply thumb pressure to activate the adhesive and the installation is complete.

Key Features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adhesive lined</td>
<td>Eliminates messy, user supplied adhesives for a faster and cleaner install; ensures the product will stay where it is installed</td>
</tr>
<tr>
<td>No liner to remove from adhesive</td>
<td>Increases productivity and lowers installed cost</td>
</tr>
<tr>
<td>Polyethylene material</td>
<td>Economical, durable, and highly flexible</td>
</tr>
<tr>
<td>Slotted or solid wall construction</td>
<td>For holes, inside curves, and straight paths to support a range of applications</td>
</tr>
<tr>
<td>Available on 100' reel</td>
<td>Allows for easy handling and dispensing of product</td>
</tr>

Technical Information

| Material:                      | Polyethylene or weather resistant polyethylene with rubber based adhesive |
| Maximum temperature rating:    | 122°F (50°C)                                                              |
| Minimum temperature rating:    | -40°F (-40°C)                                                             |
| Color:                         | Available in black or natural                                              |

Use these tables as a guide to determine PANDUIT grommet edging sizes. The most common gauges for electrical applications of sheet metal dimensions are listed based on the Manufacturer Standard Gauge for Steel.

Gauge | Manufacturer Standard Gauge for Steel (In.)
-------|-----------------------------------------------
 5     | .092                                          |
 6     | .139                                          |
 7     | .179                                          |
 8     | .209                                          |
 9     | .249                                          |
