

ROCKEATER® DRYWALL SAW

6" • 7 tpi Item #10-2206

The Rockeater® is the only SharkSaw® that cuts on the “push.” With its stiff, sharply pointed blade, it easily plunges through drywall, while its push-to-cut design eliminates tearing of drywall paper on the exposed side. Chrome plated to prevent rust, the SharkSaw® Rockeater® is tough enough to cut openings for pipes and other bathroom fixtures, even through cement board.

Recommended For: Drywall and cement board

Special SharkSaw® Features:

- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Special Drywall Blade:** The Rockeater® is specifically designed to be extra-thick to resist bending and breaking, without sacrificing speed and maneuverability in tight holes and curves.
- **Impulse Hardening:** SharkSaw’s teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
