Mounting Instructions:

1. Peel off the backing on each piece of two-way adhesive foam and attach to each leg of the Cable Corral.

2. Position the Cable Corral under your desk in a location where all cords and cables will reach.

3. Drive a self-tapping screw through the mounting hole in each leg, through the adhesive foam and into the bottom surface of the desk.

4. Be careful not to over tighten the screws, especially when mounting to particle board or other composite materials.
